Year VI., No. 13. GLEICHEN, ALBERTA, THURSDAY, JUNE 13, 1912. \$1.50 Per Year

COURT OF APPEAL

The Gleichen Town Council sat as a Court of Revision to hear the appeals from the assessment of 1912 from 10 a. m. Saturday until 4 p. m. Mayor Bray occupied the chair and all the councillors were present, during which time various members were called away to attend their private business at different times.

During the session there were some very "hot" arguments, and it would be quite impossible for the Call to even attempt a report of all the discussions that took place, but here is the result of the Court's deliberations:

Mrs. E. Schnepf 1 1/2 acres, block 22, \$1500.

Henry Schnepf, lots 18 and 19, block B, \$825.

Dr. Farquharson, lot 2, block 8, \$1000.

Robt. Rowe, 50x50 feet, block 8, \$750.

Dr. Rose, unrepresented.

F. Gaudaur, 25x121 feet, block 8, \$2,500; reduced to \$2,137.50.

J. H. Wright, lots 5 to 7 and 9 to 12, in block D, \$2,025; reduced to \$2,100.

Mrs. C. E. Clark, lots 15 and 16, block 8, \$1,000; reduced to \$800.

Geo. Moss, Jr., lots 9 and 10, block A, \$1,000; reduced to \$830.

Mrs. C. E. Clark, lots 11 and 12, block 8, \$2,500; lot 24, block A, \$875.

N. A. Bay, lots 16 and 17, block 2, \$5,000; reduced to \$4,500.

Crown Land Co., lots 19 to 21, block 7, \$7,200.

J. Tait Johnston, lots 5 to 7, block 6, \$3,000; reduced to \$2,000.

Masonic Lodge, lots 25 and 26, block 8, \$750; reduced to \$500.

Mrs. W. R. McKie, lots 14 to 16, block 5, \$5,625; reduced to \$2,800.

Harold M. McKie, lots 10 and 11, block B, \$1,000; reduced to \$800.

W. Herbert McKie, lots 1 to 4, block C, \$1,575; reduced to \$1,250.

A. C. Higgins, lots 23 and 24, block 8, \$750; unrepresented.

E. Griesbach, lots 21 to 33, block 1, \$3,300; reduced to \$2,600. Lots 27 to 32, block 2, \$2,250; reduced to \$1,950. Lots 38 to 40, block 2, \$1,200; reduced to \$1,000. Lots 8 to 10, block 5, \$1,500; reduced to \$1,200. Lots 8 to 10, block 6, \$2,000; reduced to \$1,500. Lots 19 to 21, block 6, \$3,750; reduced to \$3,000. Lots 7 to 12, block 22, \$1,200; reduced to \$1,200. Lots 18 to 24, block C, \$1,800. Lots 1 to 20, block 11, \$1,050; reduced to \$4,000.

C.P.R. Co.—Legget and Service moved "That the offer of the C.P.R. re assessment of 1912 as contained in the letter from Mr. Daughtry be accepted and that the rate be altered to conform to the said offer."

Carried.

W. J. Harlow, lots 14 and 15, block I, \$500.

C. J. Bray, 45x120 ft., block 6, \$1,500, reduced to 44x120 ft. \$1,400.

It may be well to explain that where no reduction is reported the assessment stands.

At the conclusion of the court the validity of the assessment was questioned, should it become necessary to borrow money on the assessment but it was finally settled on motion of Aldermen Legget and Service. "That the assessor revise the assessment roll to date." Aldermen Henderson and James moving adjournment.

The estimated value of the present assessment is about \$359,000, without considering any C. P. R. property.

Queenstown Items

(By Our Own Correspondent)

Miss Marie Aasgard returned home last Sunday after a year's visit with her sister in Montana.

John Glambek has taken up hail insurance and is doing quite a business.

Milo Munroe lost a couple of very valuable cows last week. He believes they were poisoned in some manner.

Gravity Water System Proposed for Gleichen

A. M. Grace, chief engineer for the Southern Alberta Land Co., interviewed the Gleichen town Council Saturday afternoon and laid before the members a scheme whereby Gleichen can secure a bountiful supply of good spring water by gravity. Mr. Grace stated that in a direct line southwest of this town ten miles there is a spring on the south bank of the Bow River 128 feet higher than the town, which he says will force water here higher than our present water tower by gravity. He has measured the flow of water from the spring at various times and it has a capacity of one and a half gallons per second. This he calculated will allow 800 people 100 gallons each a day, 50,000 gallons to the C.P.R. trains and still leave plenty of extra water for other purposes. A six-inch pipe would carry the water here at a cost of 30 cents per foot and the pipe could be laid under contract at 30 cents per foot. For about \$200 a dam could be built just below the spring which would give a reservoir 100 feet long, 20 feet wide and 12 feet deep. His company would sell the quarter section upon which the spring is located at \$40 an acre to the town, and the whole system can be put in for about about \$16,000, and then Gleichen would have a good system for all time to come.

This seems to be Gleichen's opportunity, as it will do away with our present tower and pumping plant, and give a system of fire protection and water for every use that cannot be excelled in Alberta.

and extension of the Water and Sewerage works be prepared at once." This was done and after being read the same Aldermen again moved unanimously the first and second reading.

Another motion before adjournment was carried by Ald. Henderson and Yates passing the following accounts approved by the Finance committee: Waterworks and Sewerage pay roll \$87.15; R. A. Allen \$228.26, Thos. Henderson \$2, Mc Kay Hardware Co. \$18.75, A. Whiteley \$21.20, Wm. McConnell \$8.50.

TOWN COUNCIL

Although very interesting the regular meeting of the Town Council last Friday evening passed off quietly with Mayor Bray in the chair and Councillors Service, Griesbach, Yates and Henderson present. It was 9 o'clock before business started and the Aldermen first on the scene were not making complimentary remarks concerning their belated brethren, but after the passing of the previous minutes all seemed to forget the troubles the late members caused.

Alderman Service was anxious that in future the secretary should take down the "yes" and "no" on every motion, but relinquished a motion when the other councillors agreed that it should be.

Alderman Griesbach said he had interviewed several of the C.P.R. officials and learned that company was willing to consider last year's taxes without interest, and without motion it was agreed to deal with the company in any fair manner.

The secretary read a letter from J. H. Jarvis & Co. stating that the \$1,000 by By-Law No. 28, had been duly accepted by that company. This, it will be remembered is in connection with the grading and improvements of the streets.

The next letter was from the same company providing for the By-Law No. 35, and read as follows: "Referring to By-Law No. 35 of the town of Gleichen, passed March 1st, 1912, providing for borrowing \$5,000 by the issue of debentures to pay for the completion and extension of the Waterworks and Sewerage Works, we regret that our solicitors are unable to furnish us with a satisfactory opinion as to the validity of the By-Law. We understand that any extension to the Works as mentioned above, requires the approval and certificate of the Board of Health, and a By-Law authorizing the construction of such extensions cannot lawfully be passed until such approval has been obtained. The plans and specifications for the extensions were submitted to the Board of Health after the By-Law was passed and were approved by the Board on May 20th, 1912, or nearly three months after the By-Law was passed. This objection is fatal to the validity of the By-Law.

"You will understand that as stipulated in our tender, we are unable to accept the bonds issued under By-Law No. 35, without a satisfactory opinion from our solicitors. It will be necessary for a new By-Law to be drafted and submitted to the Provincial Board of Health and their certificate obtained, before the By-Law is passed."

The reading of this letter was naturally very disappointing to the Council as the delay of the Provincial Board of Health in giving its approval and issuing a certificate necessitates the work being done over again and the ratepayers will be asked to vote again on the by-law on Friday, July 5th.

Ald. Service and Yates carried unanimously.

"That By-Law No. 35 to raise the sum of \$5000 for the completion

Baseball League Match

The first match played in Gleichen this year of the Bow Valley League took place last Thursday evening, and the Call regrets to here offer excuses for a report of the game. Please let us explain that that afternoon Manager F. H. Blackbourne requested the Call reporter to loan his score book to Gleichen's club official scorer, E. Johnston, to which request the reporter cheerfully complied when promised a complete official report of the game. Finally Tuesday morning the reporter obtained the report and here it is:

Strathmore	120400010—11
Gleichen	201000000—3

"That the Call reporter is disappointed goes without saying for he fully believed he would by Saturday have plenty of work for the printers and for once attended a Gleichen game to enjoy the fun with without worrying about the score—Enough said.

The truth of the matter is that under the new system of taxation—known as the "single-tax" the government should have made some arrangement whereby a District Court judge, or some other such capable authority, attended the sitting, and gave advice. The law stipulates that the assessment shall be the value of the property as considered "under forced sale."

All know that quite frequently an article put up to auction brings more than it could be bought privately, and, of course, as frequently less than it is really worth. Considering this it is most difficult for anyone, unless a student of law and equity, to give a proper decision.

For instance, in one case the court informed the appellant it was the privilege to build on certain lots and make good by the rent. In another the court said the assessment was made in view of the fact that the appellant had erected a building and was doing business.

The application in both instances can hardly be considered good logic at first thought. But arguments in each direction can be brought forth.

One is taxed because his neighbor improves his property, although he does not.

Argument: Two persons buy lots adjoining, each paying \$100. One builds a house worth \$900 and his property is then worth \$1900. The other purchaser makes no improvement, but, nevertheless, is assessed \$1900.

Calgary Industrial Exhibition

June 28th to July 5th, 1912

Freight paid on Alberta exhibits

Cash offered for prizes and purses \$42,000

\$18,000 Attraction Programme including

Jimmy Ward with a Curtis Aeroplane

The Famous Navassar Ladies Military Band

Four East India Elephants and other features of merit

Exhibition Entries Close June 15th.

So many inquiries are being constantly made as to the best treatment for ridding gardens of cutworms, that it may be desirable to give publicity to the best method for eradicating this destructive pest.

Either of the following remedies, it is said, will be successful if properly mixed and carefully applied.

Take a few heads of lettuce, (fresh), and dip in a solution of Paris green, in the proportion of a quarter of a pound of Paris green, dissolved in five gallons of water. After thoroughly soaking cut into pieces and in the evening place at intervals on the land where the cutworm appears.

The other, and by far the better remedy is to take five pounds of bran and dampen it with water into which about two ounces of sugar have been mixed. Dissolve a quarter of a pound of Paris green in rain water, and add to the bran and mix together, adding sufficient bran until the whole is almost, but not quite dry. When the whole is of the consistency of porridge place it in small patches wherever the cutworms appear. They will at once leave everything else and take to the poisoned bran. The mixture may be laid around the plants or in a row on either side of them. This must be done in the evening, and repeated: until the cutworms have disappeared.

There is no insect throughout Canada which gives more trouble than cutworms, of which there are about 300 different varieties, which they have very much the same habits. It hides during the day, comes up at night, drags the plant under the ground and eats it there. In 1900, in British Columbia \$187,000 damage was sustained from one kind of cut worm. We have given the only known remedies for this pest. The first application ought to clear every cutworm in the garden, and after second application there certainly should be none left.

(Continued.)

"Start where? We were just discussing your telegram, and my dear Dick, neither Mr. Dynecourt nor I can make sense out of it. Is the wording what you meant it to be?"

Her brother took the telegram from her and read it with a frown.

"Why no, I meant to tell you I was coming for you. Directly I knew she wanted you I did the only obvious thing there was to be done; I came off to fetch you. I only wired just to prepare you. 'Nausicaa' told me she wanted you more than anybody."

"She? Do you mean that Miss Dynecourt wants me? Is she ill? What is it? Oh! Dick, do try for once to be practical."

"I thought in sending for you I was doing the most practical thing possible," Dick looked at his sister, with puzzled eyes. "But why do you ask if Miss Dynecourt is ill? Of course she isn't. Can you imagine her ill? She is the perfection of lovely health and youth and strength. Why did you?"

"Oh, Dick, Dick," Clare laughed, "do keep to the important point. If Miss Dynecourt is well, who is ill? Nobody as far as I know, the artist's brown eyes were still bewildered, "but this dreadful business has been a horrible shock to us all and most of all to Lady Hester."

Both her sisters started. "What dreadful business?" Clare asked, "for pity's sake tell me what it is. I haven't an idea what you are talking about, Dick, nor has Mr. Dynecourt."

"But you must have heard of the murder?"

"Murder?" Clare's eyes grew wide and startled, but it was Dynecourt's face that waited.

"It was all in the papers this morning. I think the terrible publicity must be one of the worst troubles for Lady Hester."

"But who has been murdered?" Clare interrupted, "what has Dorothy to do with it all?"

"I haven't opened my paper today," Dynecourt added hurriedly and nervously, "no."

"The victim was my unfortunate landlady, Mr. Triton," Clare said, "but I haven't an idea what you are talking about, Dick, nor has Mr. Dynecourt."

"On what they are pleased to call strong circumstantial evidence," Dynecourt said, "that man—accused of the murder—accused of striking a man down from behind! Sir Calahad accused of a foul crime. If it were not so profound a tragedy it would be a Gilbertian comedy."

"It is unthinkable," Clare exclaimed. "I know Sir Miles very little, but even my small knowledge of him tells me that such an accusation is an outrage. And you say Dorothy wants me?" Her indignation against her old friend was merging itself into pity for her. The man accused of a dastardly murder was Dorothy's husband, and Dorothy was alone with her anxiety. It was impossible for Clare with her large heart, and long link to serve others, not to wish to be with her friend now.

"Yes, she does want you," Dynecourt answered, "she told 'Nausicaa' you were the only person she thought she could bear to have with her. I suppose her parents would be no help."

"Help?" Clare smiled, "they would be worse than useless. Her mother is a neurotic semi-invalid and her father has no more backbone than a worm. Sir Miles showed sense when he established them in South Devon. He probably knew that they had worried Dorothy's life out of her for years and thought that the further they were removed from her the better."

"Then will you come to Lady Hester's, Clare? There is a train from Waterloo at six-thirty, and I came on purpose to take you back."

"If it rested only with me I would come off now, at once, but I must talk to Matron and see what can be arranged. Do you want me to go to your cottage?"

"Heaven forbid! I couldn't stay there after they carried that poor fellow in last night. Mrs. Dyson has taken me in, but you will go to the Court."

"I will go and speak to Matron directly; but even if she gives me leave I shall have a great deal to do before I could join you at Waterloo. You and Mr. Dynecourt must go away now, and Dick, you could come back to the hospital at five, to see whether I have been able to arrange anything."

During the whole of this colloquy between brother and sister, Dynecourt had stood a little apart, listening intently, his face very white, a strange look of horror in his eyes, and it was this look of horror which arrested Clare's attention when she looked at him in ending her sentence.

"This has come as a great shock to you, too," she said in a low voice, whilst her brother strolled out of her room and walked dreamily away towards the door of the ward. Dynecourt started, his thoughts seemed to be jerked back from a very long distance.

"A great shock," he repeated in level tones, "you see, only yesterday."

"Why, you were down at Mansmere, Clare cried, "perhaps you were even somewhere in the neighborhood at the time of the murder. And it seems so doubly dreadful when a thing like this happens to people one knows."

"Doubly dreadful," Dynecourt again repeated his words, again in that level voice.

"Did you know this man, this Mr. Triton?" Clare asked the question as they stood just within the doorway of her sitting-room, and the afternoon sunlight pouring in at the high window of the ward showed suddenly the ghastly whiteness of her companion's face.

"Yes—I knew him—slightly," the words came falteringly; his eyes did not meet hers, but she saw in them once more that glance of horror and instinctively she put her hand on his arm.

"Then the news Dick brought must have come on you as a dreadful blow," she exclaimed.

"A dreadful blow." For the third time he echoed her words, and as her hand rested on his arm she felt that a shudder ran through him.

"But I am sure Sir Miles is not guilty," Clare said firmly, urged to speak by some unaccountable instinct.

"I am sure Sir Miles is not guilty," came the echo once more, and then Dynecourt said away, "an hour's moving slowly, as though still dazed and stunned by what he had heard. And Clare ran down to the Matron's office, trying to concentrate her thoughts on the exigencies of the moment, trying to thrust away from her the memory of the horror. Dynecourt's eyes the echoing monotony of his words, the whiteness of his face. The Matron, though she looked surprised at the Sister's request, was willing to grant it and anxious to put no obstacles in Clare's way when the whole story of the tragedy was unfolded to her. She was a brisk, kindly-hearted woman, a born organizer, and that rare personality—a born leader also.

"You must certainly go, Sister," she said, "this is not an everyday emergency, and it is heart-breaking to think of your poor friend alone in her home, and her husband accused of such a crime. By all means catch the six-thirty. I can manage perfectly well and I will send a substitute up within an hour to take over the ward, and you can go off with an easy mind."

With an easy mind? Clare smiled a little drearily as she went back to her room and began her preparations for departure, preparations constantly interrupted by calls upon her from the busy ward.

An easy mind? Well! her mind might be free from any hospital worries; she could contentedly leave her ward to any substitute Matron considered capable of taking charge of it, but an easy mind? She even laughed—a troubled laugh, whilst she packed her bag, for, with Oliver Dynecourt's white face and horror-stricken eyes before her mental vision, how could her mind be easy?

(To be Continued.)

be worse than useless. Her mother is a neurotic semi-invalid and her father has no more backbone than a worm. Sir Miles showed sense when he established them in South Devon. He probably knew that they had worried Dorothy's life out of her for years and thought that the further they were removed from her the better.

(To be Continued.)

Why did you fire that bellboy from the National Guard?

"Every time the Captain said 'Front' he jumped from the ranks and held out his hand for a key."

Dysentery corrodes the intestines and speedily eats away the lining, bringing about dangerous conditions that may cause death. Dr. J. D. Kingsley's Dysentery Cordial clears the intestinal canals of the germs that cause the inflammation, and by protecting the lining from further ravages restores them to healthy condition. Those subject to dysentery should not be without this simple yet powerful remedy.

Cited an Exception

A religious worker, while visiting a Western town, gave a "Talk for Men," during the course of which he expressed his conviction that no young man should visit any place to which he would not feel justified in taking his own sister.

Is there any young man present who thinks one may safely disregard this wise rule? asked the speaker.

Whereupon a youth in the rear of the hall stood up and said in a loud stentorian tone:

Yes, sir. I do.

And what, sir, demanded the angry and surprised speaker, is the place which you yourself would think of visiting to which you could not take your sister?

The barber's shop, replied the youth.

SENTINELS OF THE SEA.

Life Aboard a Lightship is an Active One After All.

A faint splash of light on a dark waste of water; the wash of the sea against the ship's side; the creak of clockwork; the measured footfall of the watch on the deck; the barely heard throb of a distant steamer, or the near loom of ghostly sails passing in the night and, through a pall of chilling mist, the boom of the foghorn hurrying its note of warning into the far-off silence.

Such in the long night hours, is one of the many lightships which keep keels vigil around our coasts—the sentinels of the sea, the protectors of those who go out on the deep waters.

To understand the spell of the life, let us step aboard a lightship.

No sooner are we on the deck than we feel at home. Spacious and cozy, one can picture happy hours spent in this craft, remote from the stress of shore life. There are even plants and flowers to give a picturesque touch of domestic life.

And the men who make their home here? They are eight all told—it may be only six—a master and his mate, three sailormen and three lampkeepers; and of this small but sufficient crew three are on duty—the remaining three are taking a well-earned rest ashore, turn and turn about.

No long-faced hermits are these guardians of the lightship, cheery men, all of them, and hospitable, as becomes a sailor, though they roam no seas.

"Dull!" said the mate of the Norse-ship to the press man on a visit. "Why, we've no time to be dull! No time for grizzling here!"

And this is the truth. From rising to sleeping no moments need be unemployed. The lantern alone keeps two of the five constantly busy. At sunset the lamps are lit, and the lantern is hoisted to its eminence, a few feet below the ball of the mast; then the clockwork is started which sets it revolving. All through the night, at frequent intervals, a gong sounds the signal for the laborious re-winding, and, as beside the watchman who is deaf to the signal, or does not keep an eye on his revolving light.

At sunrise the lantern is lowered, and a busy hour or more of cleaning follows, with rag and leather and cans of oil, until each reflector almost blinds one with its glitter. There is the foghorn to be kept booming every two minutes by strenuous work with a foot-pedal whenever the mist-clouds roll up.

Eyes must be kept ever on the alert night and day, the watchers ready at any instant to send a warning signal by gun or flag. It may be a vessel heading for a shoal; a ship in distress; an imminent collision which only the promptest action can avert. And every happening of night or day must be carefully noted by the master in his log.

But, of course, it is not all work. There are hours of rest for those on duty. And there is always the prospect of that month on shore, which comes round with such welcome frequency, and which lends wings to the day-dreamer.

No; with a cheerful spirit, plenty of work, and play, good pay, and a pension to look forward to, the life of a lightshipman is far from being undesirable, even in the isolation of a foggy night amid the lone waters of the sea.

Additions to the Zoo.

The fine collection of animals presented to the King by the Government of Nepal, and offered by his majesty to the Zoological Gardens, is now on its way to England, and is expected to reach Tilbury soon. The ship which is bringing them home is the Afghanistan, of the British India line, and she has arrived at Aden. The journey from Calcutta, the most trying part of the whole trip, fortunately did not tell too severely on the animals, and there were few important losses on the voyage. Seventy-four mammals left India, and these included a male baby rhinoceros, a four-horned antelope, examples of the very curious "one-horned" sheep, three leopards, four bears, and a number of smaller creatures. The casualties included a female baby elephant which died in Calcutta, two Bharal sheep, and a snow leopard.

Old-Time Reviews.

As an institution naval reviews appear to be quite ancient, despite the fact that most people seem to think of them as dating back no earlier than the middle of the last century. Way back in "ays" when the ships that fought us, or Nelson would have been thought incredibly large and powerful! there was a big review at the Nile, when King Charles II. inspected his fleet before it set sail to give battle to the Dutchmen off Lowestoft. A big review, too, was held in the days of William III. in honor of the Czar Peter, who, it will be remembered, took such an immense interest in shipbuilding that he worked as a hand in the shipyards himself. George III. held several reviews, though, curiously enough, Nelson never came in for the honor of a royal visit. One of the most historic reviews on record was that held in 1806, after the Crimean war, when no fewer than 240 men-of-war saluted Queen Victoria at Spithead.

Marks a London Boundary.

In the Strand, London, just by the "Griffin" monument marking the site of Temple Bar, there is to be seen, let into the kerb of the pavement, an iron anchor some 12 or 18 inches in length, with beside it the letters B. C. and D. The mark is unusual and of some interest. All we discover it to be merely the boundary mark of the Parish of St. Clement Danes!

Gold Sovereigns.

Sovereigns were first coined in the reign of Henry I., but they were then worth 22 shillings.

Busy Hair-Cutting.

During one week no fewer than 35,000 Chinamen cut off their pigtails in Hong Kong.

Zam-Buk

is the best remedy known for sunburn, heat rashes, eczema, sore feet, stings and blisters. A skin food!

All Druggists and Stores—60¢.

DOGS OF THE YUKON

They are Born Fighters, Inveterate Thieves, Sometimes Cowards.

Dogs in Alaska are of all breeds and sizes, the most common being the malamute or native dog, says a writer in the Wide World Magazine.

The word "malamute" is a Indian word, meaning Eskimo and is applied to both dogs and natives. The malamute is of the wolf strain—in fact, the best of the breed are half wolf. They evince all the characteristics of the wolf, both in appearance and in manners.

Owing to his wolflike fur, the malamute can easily stand the extreme Alaskan cold. He is a born fighter, an inveterate thief and somewhat of a coward, for he will seldom fight singly against a lone adversary. The malamute while well able to withstand the cold, does not seem to have the same order of intelligence as is displayed by the outside dog, and the best dog for Alaska would seem to be a mixture of the two strains.

Small dogs, such as fox terriers are a rarity in Alaska, for in that country a dog is valuable in exact proportion to the amount he can pull. A sleigh dog will weigh anything from 30 to 150 pounds, the average being about 57 pounds.

Dogs in Alaska, when on the trail, are fed once a day after the day's work is done. They are never fed in the morning, for if they were they would be lazy all day, or, what is more probable, would vomit up their breakfast soon after they got on the trail. Dogs, to work well, must be well fed.

They get a variety of foods, including rice, tallow, corn meal, and fish. If rice or corn meal forms a part of their food it must be cooked. Some men prefer to feed their dogs on bacon or fish, thus doing away with cooking.

The Yukon sled, while not a thing of beauty is built to stand all kinds of hard wear. The sled is about eight feet long, is made of any kind of hard wood, lies close to the ground, costs from \$10 to \$14, and makes a trail 16 inches in width. Another pattern is known as the basket sled and is to the Yukon sled what a three-masted schooner is to a coal barge. In length it is from eight to fifteen feet, is made of birch, oak, or maple, built to retail at 22 inches in width, costs from \$40 to \$2000, is raised a foot or more from the runners, and, in the best examples, is lashed together with rawhide.

The basket sled, as its name implies, is fitted with a basket, into which the load is placed, and from the back of the basket a pair of handles project to be used in guiding the sled on the trail. In very cold weather wooden runners are best, but in ordinary circumstances steel or brass runners are used.

Holes in Her Stockings.

The eternal feminine crops out in the current story of the nervous woman to whom the throat specialist, while adjusting a larynx, preparatory to an examination, remarked:

"Madame, you'd be surprised to hear how far down we men see with this wonderful instrument."

A pause followed, and then the patient faltered:

"Doctor, before you begin, perhaps I ought to tell you that I really hadn't time to mend the holes in my stockings before I came here."

Her expression of concern over appearance was as instinctive as that of the tidy New England mother who rushed from the kitchen into the hall after a crash, and enquired if any oil had been spilled on the carpet, when her daughter told down the front stairs with a kerosene lamp.

Minard's Liniment, the Lumberman's Friend.

Prolonging Human Life.

The astounding and gratifying fact is claimed that in the last half century an average of twelve years have been added to the period of human life. Since the first actual records were taken in New York city in the middle of the '60's the rate of mortality has been reduced from thirty-five deaths in each thousand inhabitants to about fifteen or sixteen. This reduction has resulted from the control of infectious diseases. The saving thus made relates only to the period of life under 50 years. There is no saving knowledge regarding the organic diseases of advancing years, which afflict especially those who have been active in affairs and who are taxed with large responsibilities.—Christian Herald.

The jawbone of a man which was found not long ago near Heidelberg, Germany, is supposed to have been 200,000 years old.

BEECHAM'S PILLS

Sold everywhere. In boxes, 25¢.

How Rome Was Saved

How are you on ancient history, inquired the Wood Street man.

Fine, declared, the sage of Smithfield Street. Ask me anything you want to know.

I was trying to recall the facts about those geese that cackled and thus saved Rome.

I remember the episode. You see Rome was a very rich city in ancient days, filled with gold and precious stones. Some invaders had gathered ed in hopes of getting big loot.

I see.

But when they heard the geese cackling they thought they'd better grab the geese and let the gold go. The cost of living was just as high then as it is now.

I comprehend.

They made off with the geese and thus Rome was saved.

Sand Songs in the Desert.

In the North African desert at some time in the year a curious phenomenon can be heard.

It is the song of the sands.

No one can say whence this song comes, but it is due to atmospheric conditions.

There are two distinct sounds: one is like the wind in telegraph poles, the other like the after-reverberation of a big striking clock.

During the time the "song of the sands" can be heard some of the sand dunes when trodden on give out a hollow, bell-like sound, and where the surface of the desert is covered with sandstone a tinkling noise is heard when this is trodden on.—London Answers.

With characteristic thoroughness the Germans have devised a real burglar proof safe, so cleverly designed that it will baffle every burglar who works with the latest of oxygen and acetylene blowpipes. It is called the carousel, or "roundabout safe."

It exhibits a polygonal steel structure revolving freely on ball bearings. It is built into a wall, and when the outer door is closed a small electromotor is set in motion, whereupon the safe starts revolving ceaselessly and noiselessly on its axis within its stone chamber.

Any tampering with its motions causes an alarm bell to ring. So long as the safe continues to revolve the blowpipe can have no effect upon it, since the flame cannot be applied long enough to any particular spot to make an impression.—Chicago Tribune.

Held Her Audience Well.

Diggs—"My wife is a wonderful vocalist. Why, I have known her to hold her audience for hours—"

Biggs—"Get out."

Diggs—"After which she would lay it in the cradle and rock it to sleep."

A Real Meat Baby.

Small Beale had been taken in to see her new baby brother for the first time.

How do you like him, asked papa. Fine, replied Beale. I was getting tired of sawdust dolls, and I'm glad we've got a real meat one at last.

A Successful Hunter.

Been hunting? Yes. Kill anything? Nope, couldn't get a guide to go with me.

Where He Must Fall.

I believe the man who loves deep thought can actually accomplish anything within human possibilities.

No. There's one thing within human possibilities that he can't do.

What, if I may ask?

Keep from seeming ridiculous to other people.

BABY'S OWN TABLETS

A MOTHER'S STANDBY

Mrs. Wm. Kernaghan, Cartwright, Mass., says: "I always use Baby's Own Tablets and find them an excellent remedy for little ones." Thousands of other mothers say the same thing simply because they have found the Tablets the best medicine to give their little ones to make teething easy; to expel worms; relieve constipation and to make baby plump, healthy and strong. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Prison Habits.

For ten years past, said the new boarder at the seaside, my habits have been regular as clockwork.

I rose on the stroke of six, half an hour later I sat at breakfast; at seven I was at work, dined at twelve, ate supper at six, and was in bed at half past nine, ate only solid food, and hadn't a single illness all that time.

Dear me, said the landlady, in sympathetic tones, and what were you in for?

Evening Things up.

What did Mrs. Kloseman give you for cutting her grass? asked Tommy's mother.

Nothing, replied Tommy.

Why, she promised you 10 cents, didn't she?

Yes, but I used her stickle to do it with, and she charged me 10 cents for the use of it.—Catholic Standard and Times.

Lord Roseberry, in a London address on tuberculosis, said that preventive measures had reduced the mortality from consumption in London by 33 per cent. between 1901 and 1909, and by 14 per cent. in England and Wales for the same period. Nearly forty thousand lives were saved which would have been lost under the average conditions of the decade of 1871-1880.

Saxony has

Are you one of those to whom every meal is another source of suffering?

Na-Dru-Co Dyspepsia Tablets will help your disordered stomach to digest any reasonable meals, and will soon restore it to such perfect condition that you'll never feel that you have a stomach. Take one after each meal. 50c. a Box at your Druggist's. Made by the National Drug and Chemical Co. of Canada, Limited.

Polite Assurance

Mr. Conductor, do you think this tunnel is perfectly safe for our travel?

Don't be afraid, mum, our company got you into the hole and we're bound to see you through.—Baltimore American.

Small Brother—Mr. Sammy, are you a football player?

Plaster's Beau—No, Tommy.

Small Brother—Then why did Sis tell me you were so much of a catch?—Baltimore American.

His Snakehip

The serpent made the reputation of Adam and Eve.

Right you are; the snake was the first publicity agent.

A corrector of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in curing disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes as no other preparation can.

Sister Knew It

Modest Sister—I am going to marry your sister, Willie, but I am not good enough for her.

Candid Little Brother—That's what Sis says, but she's been telling her that she can't do any better.—Brooklyn Life.

Minard's Liniment used by Physicians

Blinks—What do you think of Dr. Cook? He says that he's going to live to be 150 years old.

Jinks—That's nothing. I know some jokes that are 200 years old.

Warts are disfigurements that disappear when treated with Hollaway's Corn Cure.

Goldstein is a newly made country gentleman who is visiting the village school—"Now, can any one of you boys tell me what nothing is?" Small voice (after long silence)—Please sir, you got me for 'olden' yer 'orse yesterday.—Punch.

HORSES NEED CAREFUL HANDLING

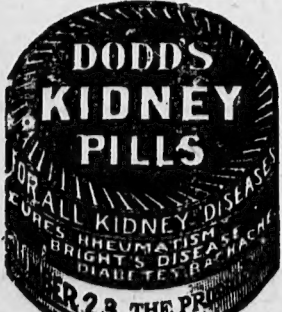

To most horse owners it is a matter of costly experience that an apparently slight wrench or sprain or cut is much more serious in a horse than in a human being. A man goes ahead and works it off, but the horse is liable to be "put out of commission" for weeks or months.

When this has happened in a busy season, the horse owner is thereafter keenly interested in getting quick action at the first sign of accident or disease. In fact many successful horsemen make a practice of looking each animal over carefully every morning to see that it is all right. If it is not, they get busy at once.

A great help then is a little book called "A Treatise on the Horse and His Diseases," published by Dr. B. J. Kendall Co., Enosburg Falls, Vermont. While it emphasizes the necessity of sending promptly for the Veterinary in serious cases, this little book tells clearly and briefly just what to do for such ailments as Spavin, Splints, Ringbone, Wire Cuts, Lameness and Sprains, that can be effectively cured by home treatment when one knows what to do and has the proper remedies handy.

This book can be obtained free from any druggist who sells Kendall's Spavin Cure, the thirty-year old standby, or direct from Dr. B. J. Kendall Co., by simply writing them at Enosburg Falls, Vt., U.S.A.

Shall we go to Europe on our honeymoon, dear? She—I want to go awfully. But it seems such a waste of time to miss seeing all those wonderful things.—Life.

W. N. U. 901

Pen Pictures

It is probable that no institution in the Dominion of Canada comes into touch with so large a number of persons who have made improvident investments as does the Annuities Branch of the Post Office Department. It is understood that hardly a day passes that several communications are not received in which the writers bewail the loss of money invested in some scheme that promised phenomenal dividends or returns. One of the saddest of these cases is that of a lady who about three years ago acquired as to the cost of an Annuity of \$500. The information was promptly given to her, but the opportunity to purchase was not embraced. She believed she could invest her money to better advantage, and that by the time she attained her 55th birthday she would not only have enough to pay for the Annuity outright, but a little fortune besides. This week another letter has been received from the same lady, who by the way, is now over fifty years of age, which furnishes the sequel to the story. She says: "I have spent my savings on worthless stocks, believing, firmly believing, that I would soon be rich. I would not listen to advice, convinced that I knew best. I wonder at my foolishness now, to waste my all in schemes I knew nothing about. For some time I had a large salary and gave to certain companies every month. Now that they have turned out worthless, I am how crazy and wrong I was. Am sorry, if ever anyone was sorry for what I have done, but nothing will bring back what I have wasted." Her case is a pathetic one, and her experience has been costly, but it is the common experience of many who have tried Get-Rich-Quick schemes.

In the same month of the same year (1902) another lady enquired as to the cost of Government Annuity. She, too, had saved a nice little sum for the "Rainy Day" as the result of her own labors. She began payments with a view to purchasing the same amount of Annuity to begin at the same age (55). In the course of time she became afflicted with a malady, which, though not fatal, incapacitated her from earning a livelihood. Under the terms of the Act she was entitled to have her contract converted into an immediate Annuity. She had this done, and is now receiving, and will receive as long as she lives, an annuity of over \$500. It is doubtful if there is a more satisfied woman in all Canada.

The Annuities System does not promise to give something for nothing, and no benefits can be received which are not paid for; but it does promise to give a return, and with the security of the Government of Canada behind it, greater than can be obtained from the investment of the same amounts in any other manner. "World's Work" says: "It is the Savings Bank, the Insurance Company, and the Government Bond rolled into one in a shape adapted to the smallest of depositors." Your Postmaster will furnish you literature descriptive of this marvelous system of investment, or you may obtain the information desired by writing to the Superintendent of Annuities, Ottawa, to whom your letter will go free of postage.

Herodotus Sustained

The inexperienced candidate had had a bad time. He had been severely heckled and his temper was at breaking point.

"Gentlemen, he said presently, in exasperation, 'Herodotus tells us—'

"Which side is he on?" came a voice from the crowd.

But the candidate was determined to have his say.

"Herodotus tells us," he went on firmly, "of a whole army that was put to flight by the braying of a single ass."

Then the crowd applauded, and the young man thought at least he had scored. But his triumph was short-lived, for again came a voice from the crowd this time in a resigned tone.

"Young man," it said quietly, "go ahead; this army has been tested."

Los Angeles Herald.

Brain of Its Own

An inexperienced colored girl had just been installed as housemaid. Having eyed a patient bottle with much curiosity for some time, she asked her mistress: "And what sort of thing is dat, ma'am?"

"That," replied madam, "is a bottle of 'that.' Keep things either hot or cold."

"Land sakes, honey!" exclaimed the astonished darky, "how is it gwine to know whether you want it to keep things hot or cold?"—Ladies' Home Journal.

A commercial traveller, at a railway station in one of our southern towns, included in his order for breakfast two boiled eggs. The old darky who served him brought him three.

Uncle, said the travelling man, why in the world did you bring me three boiled eggs? I only ordered two.

Yes, sir, said the old darkey, bowing and smiling, I know you did order two, sir, but I brought three because I just naturally felt dat one of dem might fall you, sir.—Harper's Weekly.

Not a Boss

You shouldn't call me a boss, said Mr. Wardheel.

But you are a leader and an autocrat.

Maybe. But a boss is a man who makes people work. My specialty is showing anybody I take an interest in how to live easy.—Washington Star.

I understand your husband is a candidate for office, said a suffragette out west to her sister in the cause. Are you going to support him? Oh, I suppose so, answered the sister, somewhat wearily. I've been supporting him for the past ten years.—Chicago Record Herald.

Teacher—Haven't you studied your arithmetic lesson?

Scholar—No'm. I didn't have no time to learn nothing but me grammar lesson.—School Sixty Two.

The milk dealer, fined for selling a watered article, exclaimed indignantly: "Why, if I didn't water it, half my customers wouldn't get any!"

Women of Persia

During the last five years, the women of Persia have become almost at a bound the most progressive, not to say radical, in the world. The fact makes one gape with astonishment, and upsets the previous notions of centuries.

Without the powerful moral influence of the Persian women—those so-called chatters of the oriental lords of creation—the abort-lived, but nervously conducted revolutionary movement in Persia which has recently been smothered by Russia and England would have paled early into a mere disorganized protest. It was they, from their cloistered lives, who, with the patriotic support of the Islamic priests, fomented the national movement of the forms of government and for the inauguration of western political, commercial and ethical codes.

How to Become a Neuroasthenic

Eat no breakfast. Indulge in but one meal daily; at any rate, not more than two. Eat no meat. Eat freak cereals, vegetables, nuts and fruit. Masturbate every moral 24 1/2 times every morning. Take a cold bath every morning.

Be massaged daily. Read the health magazines daily. Read all the books on how to gain self-control and on psychotherapy. Concentrate the mind upon the digestion and upon all articles of diet. Upon every possible occasion discuss your imaginary troubles with your friends and coeoe your wife into catering to every dietetic whim that you can formulate. Buy a lot of apparatus for indoor exercise and roll a cannon ball around over a selected portion of one's anatomy.

DIFFERENT NOW

Since the Slugger, Coffee, Was Abandoned

Coffee probably causes more biliousness and so-called malaria than any one other thing—even bad climate. (Tea is just as harmful as coffee because it contains caffeine the drug in coffee).

A Ft. Worth man says:

"I have always been of a bilious temperament, subject to malaria and up to one year ago a perfect slave to coffee. At times I would be covered with boils and full of malarial poison, was very nervous and had swimming in the head.

"I don't know how it happened, but I finally became convinced that my sickness was due to the use of coffee, and a little less than a year ago I stopped coffee and began drinking Postum.

"From that time I have not had a boil, not had malaria at all, have gained 15 pounds good solid weight and know beyond all doubt this is due to the use of Postum in place of coffee as I have taken—medicine at all."

"Postum has certainly made healthy, red blood for a place of the blood that coffee was making impoverished and made unhealthy." Name given by Canadian Postum Co., Windsor, Ont.

Postum makes red blood. "There's a reason," and it is explained in the little book, "The Road to Wellville," in pkgs.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

A small Norwegian lad presented himself before a school teacher, who first asked him his name.

Pete Peterson, he replied.

And how old are you? continued the teacher.

I do not know how old I have, replied the lad.

Well, when were you born? continued the teacher.

I am not born at all, I got step-mutter.—Metropolitan.

There is often a marked difference between a good business man and a "good" business man.—Puck.

COUGHS AND COLDS

Are Dreaded by Mothers Who Fear for the Safety of Their Children

DR. CHASE'S SYRUP OF LINSEED AND TURPENTINE

What a weight of responsibility rests on the mother of the family during the winter season! In every cough and cold she recognizes the voice of Croup, Bronchitis, Consumption or other deadly throat and lung complications.

Few people, even among those who are convenient to doctors, can afford the luxury of a physician for every cough or cold, even though they realize the seriousness of neglecting such ailments.

For all such, Dr. Chase has provided a prompt means of cure known as Dr. Chase's Syrup of Linseed and Turpentine.

One reason why mothers prize this treatment above all others is because of its suitability for children. It is sweet and pleasant to the taste, and children like to take it. Its soothing, healing action is wonderfully prompt in curing Croup, Bronchitis and Whooping Cough, and can be used by children with perfect safety so long as directions are followed.

Thousands of families in Canada keep Dr. Chase's Syrup of Linseed and Turpentine in the house at all times for use in cases of emergency. This is the only way to be sure of protecting the bronchial tubes and lungs against coughs and colds. 25c. a bottle, family size 50c. at all dealers or Edmanon, Bates & Co., Limited, Toronto.

My doctor says I ought to ride a horse, said the indolent man. "What for?" I don't know. Maybe he's tired of treating me for dyspepsia and wants broken collar bone for a change.—Washington Star.

RAISING FLAX FOR ITS FIBRE

Modern Inventions Promising to Make Southern Alberta a Bonanza Flax Growing Section

The Canadian Board of Control of the International Dry-Farming Congress in its Diversified Farming campaign announces that the growing of flax for its fibre should be taken up in Southern Alberta, and points out that it can be made a veritable bonanza with the establishment of linen mills, which must come in this section because of the requirements of the home markets.

There being abundant water power in the province for mechanical motor engines, sufficient coal for a cheap engine fuel, and suitable water for wetting in the conversion of flax fibre into fabrications of linen, there is everything required as a natural raw material right at hand. Thus, right here in Alberta, all kinds of linen goods can be produced to sell within a fraction if not at just as low a price as cotton goods—a great boon to all farmers.

The growing of flax for seed has been very successful, and many of the progressive dry-farmers of Lethbridge and vicinity have this season begun the putting in of a large crop. It is not too late yet, for flax can be sown up to the 15th of June, although the earlier the safer.

For many centuries 16 weeks have been consumed in getting flax ready for spinning, and a further four or five weeks have been necessary in which to bleach the linen product for the market. By a new process raw flax can now be converted into perfectly bleached linen fibre ready for spinning in one day. Sound straw will yield 47 per cent of spinning fibre, realizing \$500 per ton on the market. By harvesting at the proper time good fibre can be produced, and a fair crop of seed can be obtained at the same time—the mechanical operation of removing the seed without, as hitherto, injuring the fibre for linen production being practiced in the United States.

The new process for converting flax straw into linen within the short space of one day, has passed beyond the experimental stage, and capital invested in this direction would be a far better method, because of the certainty of returns, than in gold or other mines where milling requires millions, and then the outcome from a financial standpoint is always, or nearly so, an indefinite quantity, and the duration of the lode a mighty uncertainty.

Flax is a hardy plant to grow; with an abundance of water it is a certain wealth producer; and the various uses to which the straw and seed can be put place it beyond the stage of the uncertain.

What Crop Rotation Will Do

It is interesting to note that the land which produced Seager Wheeler's \$1000 bushel prize wheat at Rosbarn, Sask., last year was carefully cultivated and the yearly manner of cropping the land was as follows:

First year—Breaking.

Second year—Oats, a heavy crop.

Third year—Potatoes, new turnips.

Fourth year—Canadian Thorpe 2-rowed barley, yield 75 bushels an acre.

Fifth year—Summer fallow.

Sixth year—Wheat.

Seventh year—Wheat.

Eighth year—Oats, heavy crop.

Ninth year—Summer fallow.

Tenth year—Preston wheat, 60 bushels an acre.

Eleventh year—Potatoes.

Twelfth year—Wheat, 40 bushels an acre; also seed plot of Preston.

Seed plots and potatoes and turnips.

Thirteenth year—Summer fallow.

Fourteenth year—Marquis wheat, awarded \$1000 prize at New York Land Show.—From Dry-Farming, Lethbridge, Alberta.

A Bad Lot

A forlorn looking man was brought before a magistrate for drunkenness and disorderly conduct. When asked what he had to say for himself, he gazed pensively at the judge, smoothed down the remnant of gray hair and said: "Your honor, man's inhumanity to man makes countless thousands mourn. I'm not so debased as Swift as profligate as Byron, as dissipated as Poe or as debauched as—"

"That will do," thundered the magistrate. Thirty days. And, officer, take a list of those names and run 'em in. They're as bad a lot as he is.—Savannah News.

Bald Head Partings

Before a man begins to get bald he parts his hair on the side way down just above his ear, but as the hair starts to come out then he begins to part it in the middle and later when about all of it is gone on the top he again goes back to parting it down low to one side and lets the short hairs over the ears grow long and brushes the over his bald spot.

From the little boy in curls to the old man with little or none left is a good enough theme for the immortal Shakespeare.—New York Press.

Only Half Guilty

Senator Williams, in an address in Yazoo, said of a movement he opposed:

These men try to apologize for their course, but their apology reminds me of that of the Yazoo office boy. A business man, looking up from an important letter he was drafting, said to his boy testily:

Don't whistle at your work, Calhoun.

I ain't workin', sir, Calhoun answered promptly in curing Croup, Bronchitis and Whooping Cough, and can be used by children with perfect safety so long as directions are followed.

Thousands of families in Canada keep Dr. Chase's Syrup of Linseed and Turpentine in the house at all times for use in cases of emergency. This is the only way to be sure of protecting the bronchial tubes and lungs against coughs and colds. 25c. a bottle, family size 50c. at all dealers or Edmanon, Bates & Co., Limited, Toronto.

Blitz—Did you know that the oldest of Price's seven daughters had eloped?

Stiffert—No. How was the old man affected?

Blitz—Oh, he took on dreadfully at first; then he found out that every one knew he had bought the girl's railway ticket.—Judge.

The Real Trouble

Festive gentleman (returning home)—It's all very well—saying there's no place like home—but it's getting there's the trouble.—London Opinion.

ONE TIRED WOMAN AND ONE LITTLE OVEN

You have probably been there yourself—perhaps are right now.

Bright women all over Canada are getting away from this. They welcome **MOONEY'S BISCUITS** as a most acceptable substitute for their own bread and biscuits.

MOONEY'S PERFECTION SODA BISCUIITS

are the crispest, creamiest crackers made. Better still, they are baked in Winnipeg; right at your very door. They come to you fresh as the product of your own oven.

You can have them in air-tight packages or sealed tins as you prefer.

\$1.00 PER HOUR

This is what you can make selling "Evergrip" Gliding Casters. Many of our agents are making more. Every home, church, hotel, barber shop, a customer per cent profit. Full sample set and agents terms sent for 10 cents. We want a good agent in your town.

No Place for Him

William, come. I refuse to sit through another act of this show with you.

But, my dear, it may not be—"No, no. It isn't fit for decent people to see. I refuse to stay here with you any longer.

Very well, if that is the way you feel about it. Only I would like to know how the plot is unfolded.

I'll get a matinee ticket and tell you.—Pittsburg Post.

Little Florence had a very bad toothache and was crying softly to herself. Her aunt, who was a believer in Christian Science, went over to the little girl and said: "If you had any faith dear, you would have no toothache." Florence continued to sob, but Florence sobbed she replied: "Well, Aunt Grace, if you had my toothache you wouldn't have any faith.—Judge.

Quite Another Matter

Mother—There now, don't whip Johnny. You know the Bible says, 'Let not the sun descend upon your wrath.'

Father—That's all right, but it doesn't say not to let your wrath descend upon the son.

What is this domestic science? Inquired the engaged girl. It consists of making hash, out of the left-over meat and croquettes out of the left-over hash, explained her more experienced friend.

Dr. Morse's Indian Root Pills

exactly meet the need which so often arises in every family for a medicine to open up and regulate the bowels.

Not only are they effective in all cases of Constipation, but they help greatly in breaking up a Cold or La Grippe by cleaning out the system and purifying the blood. In the same way they relieve or cure Biliousness, Indigestion, Sick Headaches, Rheumatism and other common ailments. In the fullest sense of the words Dr. Morse's Indian Root Pills are

A Household Remedy

When a New Perfection Comes in at the Door Heat and Dirt Fly Out at the Window.

What would it mean to you to have heat and dirt banished from your kitchen this summer—to be free from the blazing range, free from ashes and soot?

New Perfection Oil Cook-stove

With the New Perfection Oven, the New Perfection Stove is the most complete cooking device on the market. It is just as quick and handy, too, for washing and ironing.

THE IMPERIAL OIL COMPANY, Limited

Her Busy Life

Aunt Martha spends all day long hiding her silver in 50 different places to defeat the burglars she is perfectly sure are coming here.

Goodness!

And she spends all night hunting for it and gathering it into one pile in case of fire.—Harper's Magazine.

Her real Yearning

Caroline—My, I'd like to see my name in print.

Pauline—Yes, especially in the marriage license column.

Quite Different Now

When I was a boy I used to think there was a pot of gold at the end of a rainbow.

And now? I have turned my attention from rainbows to mining stocks.

Sir, I am talking about what you owe me. Will you please pay me some attention? Certainly, if you do not want me to pay you anything else.—Baltimore American.

THE PIONEER STORE
J. A. E. BEAUPRE

THE OPPORTUNITY OF A LIFE-TIME TO SHARE IN THE PROFITS OF A NEW INVENTION

We hereby offer for sale a limited amount of our CAPITAL STOCK at par, TEN DOLLARS PER SHARE, in order to facilitate the more rapid development of our business.

We own exclusive patents for the United States and Canada covering the "MOWBRAY" CARBURETER, which has proven to be THE ONLY SUCCESSFUL GENERAL PURPOSE KER-ROSENE CARBURETER IN THE WORLD, in addition to being more ECONOMICAL and EFFICIENT with gasoline and being entirely unaffected by FROST or ALTITUDE, which is a great advantage over other carbureters.

IMMENSE FORTUNES have already been made by original investors, even for small amounts, from new inventions with wide demand such as the BELL TELEPHONE, NATIONAL CASH REGISTER, WESTINGHOUSE AIR BRAKE, etc., and we are prepared to prove that the profit-earning possibilities of our carbureter compare very favorably with any of the above.

In an investment of this nature, MERIT, COMMERCIAL DEMAND, MARGIN OF PROFIT AND EXCLUSIVE CONTROL OF INVENTION as well as responsibility of management should be investigated, and we shall be glad to furnish information to this end.

PRACTICAL DEMONSTRATION of the above carbureter, as well as PATENTS and PROSPECTUS, can be seen at 718 Fourth street east (Castello Block, corner Eighth avenue and Fourth street east), Calgary, Alta.

INVESTIGATE AND ACT WITHOUT DELAY, as this company, though in its infancy, has a practically unlimited field, and price will be advanced considerably after a limited amount of stock has been sold.

Any two of the undermentioned are hereby authorized jointly to sign temporary receipts for payments made with application for stock pending delivery of regular certificates.

The Grain Growers Grain Co. in Trouble

By request of several shareholders in the Gleichen district the Call publishes the following letter, and hopes it may prove of benefit:

Fellow shareholders:—

A growing discontent with the manner in which the affairs of the company have been conducted has existed in the directorate for several years.

Last July, after the annual meeting, it found expression in the abolition of the offices of first and second vice-president, held respectively by Mr. John Kennedy and Mr. R. Mackenzie, and the doing away with the Board of Control, of which the president, Mr. T. A. Crerar, and the occupants of these offices were the members. At the same time Mr. Crerar was appointed managing director, with wide supervisory and disciplinary powers, in the hope of improving the extremely unsatisfactory quality of much of the work done by the office staff, and of more successfully regulating the activities of certain important officials of the company who seemed prone to exceed instructions.

An ill-considered substitute for the board of control, devised on the spur of the moment, and really inconsistent with the office of managing director except as it contented itself with being simply advisory thereto, proved unworkable as a governing body, but was the means of speedily convincing a number of the directors of the urgent need for removing Mr. Crerar from office and replacing him by some one who would exhibit considerably more industry and business ability, more loyalty in carrying out the wish of the directors as expressed by resolutions of the board, and more sympathy with the objects for which the company was organized, than he has shown himself to possess.

Our dissatisfaction finally culminated in a demand for a special full meeting of the board of directors to consider the condition of the affairs of the company, and, in the light of this, the question of future management.

At this meeting the following resolution was presented:—"That in the opinion of this board it is absolutely necessary that the position of managing director should be declared vacant."

While the majority of the directors expressed themselves as displeased with the manner in which the affairs of the company had been conducted, the above resolution received only four of the five votes necessary to secure its passage. Thereupon we four directors who voted for it, and whose names are attached hereto, resigned in a body, as a protest and with a view to leaving us free to bring the matter in a forcible manner to the attention of the shareholders without waiting till the time of their assembling.

We desire that the situation should be dealt with vigorously but without prejudice and with full knowledge of the facts, at the annual meeting in July next, and to insure this we desire that the meeting should be as large and truly representative in character as possible.

We advise, therefore, that as many shareholders as are able should attend the meeting, and that those unable to do so, instead of sending in their proxies to be voted by persons of whose judgement and good faith they are not sure, or intrusting them to paid agents of the company traveling about the country, should delegate some responsible shareholder from their own locality to represent them at the meeting and vote their proxies in accordance with whatever the facts brought out may warrant.

This company was organized for the purpose of protecting and advancing the interests of the growers of grain. It is the manifest duty of every grain-growing shareholder, therefore, to see to it that the men at its head remain in sympathy with that purpose and prove themselves competent to carry it out, or that they be speedily replaced by others more worthy of their confidence.

We have not stated our objections to the way in which the affairs of the company have been, and are being conducted, in any very specific manner. These are matters for the shareholders alone, and not for the general public. They can be threshed out among ourselves in the annual meeting without any help or advice from outsiders, particularly grain men and politicians.

Shareholders! this is your company. We think you need it; but you need it kept in shape to serve you loyally and well.

In retiring from the directorate we give you our opinion, based on a more intimate knowledge than the majority of you possess, that a change of management is highly desirable in the interest of share-

holders and shippers alike.

Here our responsibility to you ends.

Now it is for you to make the annual meeting truly representative; by searching inquiry to become acquainted with the facts which led to our retirement from the directorate; and then to take such action as seems most likely to insure the accomplishment of the purpose for which the company was organized.

John Spencer, Winnipeg, Man.
N. E. Baumunk, Dandurn, Sask.

The Honorable Richard McBride, premier of British Columbia, has accepted the invitation of the Calgary Industrial Exhibition to officially open the exhibition on Saturday June 29th.

The Gleichen Boy Scouts are quite disappointed that they were not called to search for the wild Indian on Monday of last week. The Call agrees with the boys. It was a slight to them—they should have been allowed the opportunity of spending the night on the prairie in search of the murderer.

Among the judges appointed for the Calgary fair who have already accepted invitations to act are as follows: Prof. W. B. Richards of Fargo, N. D., Percherons, Belgians and Suffolk Punch; Wm. McKirdy, Napulua, Man., Clydes and Shires; Capt. Robson, London, Ont., Short-horns; Prof. Jarvis, Grimby, Ont., Poultry.

The Chicago papers of May 31st announce that at the aviation meet at Cicero on the 30th of May, Jimmy Ward who is to make two flights daily at the Calgary Industrial Exhibition, June 28th to July 5th, paid an unexpected visit to the Grand Park at about 5 p.m. in his Curtis machine "Shooting Star." He flew in thirty miles from the amusement park where he is exhibiting, and returned after a half hour's rest. During the journey he reached an altitude of 8500 feet. He is giving very successful flights at Riverside Park, Chicago, and visitors to the Calgary Industrial Exhibition may look forward with pleasure to witnessing his flights during the Calgary Fair.

ONCE IN A WHILE

(By Ella Wheeler Wilcox.)

It is easy enough to be pleasant
When life flows by like a song,
But the man worth while is the one
—who will smile
When everything goes dead
wrong;
For the test of the heart is trouble,
And it always comes with the
years,
And the smile that is worth the
praises of earth
Is the smile the shines through
tears.
It is easy enough to be prudent
When nothing tempts you to
stay,
When without or within no voice of
sin
Is luring your soul away.
But it's only a negative virtue
Until it is tried by fire,
And the life that is worth the hon-
or of earth
Is the one that resists desire.

By the cynic, the sad, the fallen,
Who had no strength for the
strife,
The world's highway is cumbered
today—
They make up the item of life;
But the virtue that conquers pas-
sion,
And the sorrow that hides in a
smile,
It is these that are worth the hom-
age of earth.
For we find them once in a while.

The apple was discovered by the
Romans, but it is more than likely
that Othello was the first to locate
the watermelon.

Truth is like a good man. You
cannot keep it down.

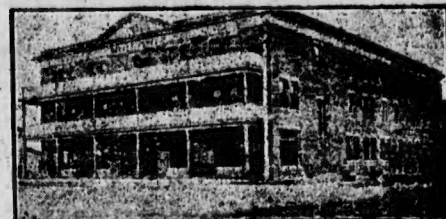

All live business people advertise
in the papers. The dead use tomb-
stones.

The "pickle bottle" is a great aid
in the municipal government of old
London.

The free publicity man is still do-
ing business with the greenhorns of
the country press.

There is nothing more pathetic
were it not so common, than the
sight—so often seen—of the hard-
working, conscientious mother who
literally wears out her life in un-
heralded toil, thankless and not ex-
pecting thanks. She has no "eight-
hour day." Even a twelve-hour
day would be a boon to most wives,
who in the care of the house and
children are always "doing over-
time" without thought of extra
pay.

CANADA TO PARTICIPATE IN PROPOSED PEACE CELEBRATION

Will Join With Great Britain and the United States in Celebration of One Hundred Years of Peace Between English Speaking Nations

Ottawa.—Canada has taken steps to join with Great Britain and the United States in joining two years from now in the proposed celebration of the hundred years of peace between the two great branches of the English-speaking people.

The decision to do so was reached at probably the most representative gathering ever held in Ottawa. Under the presidency of Sir Edmund Walker, statesmen, leaders in intellectual thought, captains of industry and representative women gathered together to arrange for Canada's participation in the peace centennial.

A representative committee was appointed to draw up the basis of the association which will be formed to arrange for Canada's co-operation and there is every prospect that it will be fully representative of every part of the Dominion.

Sam Baker, M.P., of Hamilton, moved that Sir Edmund Walker take the chair, and this was carried. Sir Edmund made a statement as to the object of the gathering, explaining that a committee formed in the United States has been at work on the project for some time, and that considerable correspondence had been carried on with that committee. Steps had also been taken in Great Britain for that purpose. It having become necessary for some one to take the first step, a circular had been issued, in response to which the gathering of today had taken place. Sir Edmund added some observations as to the interest of the English-speaking world in the passage of the Treaty of Ghent, which had started this period of peace.

Hon. G. H. Perley read a letter from Sir Wilfrid Laurier, stating that he was confined to his home with lameness, and would not be able to be present much to his regret.

Hon. W. T. White, minister of finance, speaking on behalf of the government, expressed his pleasure at attending to many prominent and distinguished citizens of Canada present, and to express the interest and sympathy of the government.

TO BE 3,000 UNDER CANVAS

Military Camp Near Calgary Embraces Whole West

Calgary, Alta.—It is estimated by military officials that close on three thousand men will take the field and remain under canvas during the fortnight which the military camp will last.

The big camp will open on June 15 and it is expected that all military organizations from Canada will be represented. Attachments from such points as Winnipeg and many of the smaller towns of the province from Saskatchewan and British Columbia will be also strongly represented by officers and men.

H.B. RAILWAY TENDERS

Government Will Let Work on Second Section of Sixty Eight Miles

Ottawa.—Within the next few days the Department of Railways will advertise for tenders for the second section of the Hudson Bay Railway. This will comprise 68 miles between Split Lake Junction and Thicket Port. The tenders, it is expected, will be kept open until about the end of July in order that prospective tenderers may have an opportunity to ascertain the nature of the country through which the section runs and make their specifications.

Helping Out the Australian Fleet

London.—Arrangements have been made whereby the admiralty will lend the cruiser Encounter to the Australian squadron for the purpose of training crews. The Encounter will be recommissioned with specially qualified officers and a nucleus crew. The note imparting this information to the Australian government concludes: "We will continue to aid in the development of the Australian fleet by every means in our power."

Warships Go to China

Washington.—Rear Admiral Osterhaus has notified the navy department that he has designated the battleships Missouri, Mississippi, Minnesota, and Ohio, the fourth division of the Atlantic fleet to go to Guantánamo. He does not say when the ships will leave. Rear Admiral Usher commands the division.

German Prince an Author

Perlin.—Prince Frederick William has made his debut as an author. "From My Hunting Diary," which is now being printed, describes the crown prince's hunting experiences in Germany and abroad. Many photographs will appear in the book, some of them by the crown prince.

Brought Whole Car of Americans

Calgary, Alta.—G. C. Peary, general agent for the C.P.R. at Washington arrived here recently and brought with him a whole car of Americans, whom he will take east to purchase farm lands.

State Welcome for Cadets

Ottawa.—Hon. Sam Hughes, minister of militia, has received a cable from Hon. Mr. Pierce, minister of militia for Australia, announcing that the Canadian Cadets from British Columbia, who are to visit Australia this summer, will be given a state welcome by the commonwealth government.

Duke of Sutherland's Estate

London.—(C.A.P.)—The Yorkshire estate of the Duke of Sutherland, who has decided to make his home on his western Canada farmlands, was put up for auction recently. The estate comprising 167 acres, brought \$22,770.

ENDORSES IMPERIAL FLEET

J. Norton Griffiths Approves of Suggestion Emanating From Canada

London.—Speaking at Staffordshire J. Norton Griffiths, M.P., said that he endorsed to the full the suggestion of Winston Churchill's suggestion which emanated from some of Canada's leading journals for the creation of a great imperial fleet, controlled by a special board of the admiralty, composed of representatives of the dominions and the mother country. Such a board would gradually absorb the present board of the admiralty and would lead to the creation of the greatest and most powerful fleet within the power of the British Empire to create. There was a spot like Malta in the Mediterranean chosen as headquarters, it would be an excellent base from which at chosen times, they could visit the different dominions and pay the visits of courtesy to foreign countries which the great trade of the empire demanded.

STOCKING BIG RANCH

Gordon, Ironside and Fares Bringing Cattle From Texas

North Portal, Sask.—There cleared the customs office recently one of the largest shipments of cattle that ever entered Canada at this point, being a train of twenty-five cars, totalling 986 Texas cattle shipped from El Paso and consigned to Gordon, Ironside & Fares, Lethbridge. They will be placed on the Blood Indian reserve near Cardston. This is the first of a shipment of 4,000 to be placed on this ranch.

Their Families Coming Now

Calgary, Alta.—The first of the families from the British Isles to be brought out under the auspices of the Imperial home reunion association of Calgary are now arriving in Calgary to join the husbands and fathers who have anxiously awaited their coming.

THE POLICY THAT PAID

MANY SETTLERS FROM U.S. CAME TO CANADA

Estimated That Canada's Immigration Policy Resulted in a Loss of \$125,000,000 Each Month to the United States Through Exodus of American Farmers.

Seattle, Wash.—Whatever ultimately may be done it appears to be the consensus of opinion of the delegates to the development league congress, that all possible pressure be brought to bear to cause the United States department of commerce and labor to enter on a publicity propaganda immediately in an effort to obtain the exposition of advantages and opportunity, that will wait the settler in seven western states under the auspices of whose governors the meeting has been called.

An effort is to be made to organize a movement that will render it incumbent upon custom collectors and other government officials at all ports of entry to promulgate information relative to the fertility of the soil, the agreeable nature of the climate and the vast natural wealth that await the settler in the states. It is the intention that each state shall compile statistics pertaining to its own advantages and that the government shall undertake to have these printed in booklet form and distributed wherever opportunity affords.

It is believed by the seven governors and their colleagues, that it has been because Canada adopted aggressive means of attracting settlers not only maintaining information bureaus at home, but in foreign countries, that she has succeeded in attracting an average of 11,000 farmers a month from the western states.

It is estimated by customs officials that the exodus of these American farmers has resulted in a loss each month of \$125,000,000.

The western states will also de-

vises a means to attract settlers in anticipation of the great development to come with the opening of the Panama canal. The canal also is expected to open a new channel through which immigration from Europe may flow into the western states. It is estimated that the cost of landing foreigners from Europe on Pacific coast soil after the completion of the canal will be about 10 per cent greater than the present cost of landing them in New York.

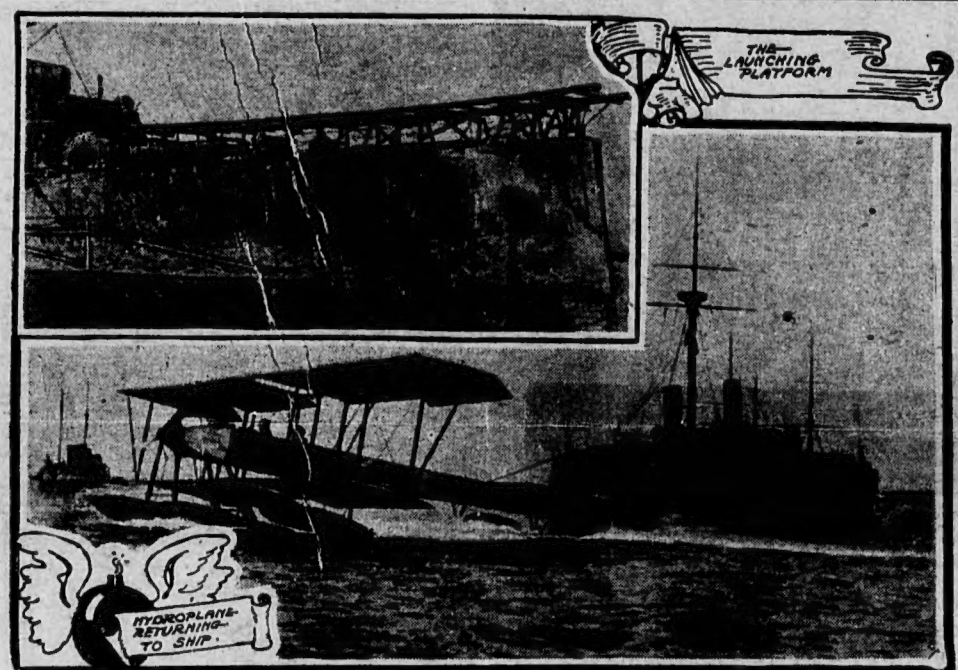

The feeling here is that Canada has been right, and that she has waged a fair and square fight for immigration, and that she has been successful to the detriment of western states.

They say Canada has been given five years' start through her wide-awake policy in the administration of her lands. On the other hand the homesteader has not been given the encouragement he should have had in the United States, they say, and some even go further and say that the moment a man takes up a homestead here he becomes a crook, a thief, and other undesirable things in the eyes of the powers that be.

It is estimated that there are in the western states 100,000,000 acres of good land to come under the plow. The seven northwestern states represent at the congress here comprise 21 per cent of the entire area of the United States. According to James J. Hill, these states are capable of supporting an exceedingly dense population, and still the total number dwelling there does not amount quite to six million. The total population of the United States is now claimed to be nearly 100,000,000.

In the past ten years the population of these western states have increased to the small extent of one million.

During the past two years, thousands of the most prosperous farmers of these seven states, not to speak of the hundreds from other states, of the union, have gone to the prairies of western Canada to what they believe to be opportunities under more desirable conditions.

NEW ARM OF THE BRITISH NAVY WHICH THE KING HAS BEEN INSPECTING

THE MARKET REPORT

Weekly Grain Letter Supplied by Thompson, Sons & Co., Grain Merchants, Winnipeg.

Winnipeg, May 29.—There has not been much change in the wheat markets during the past week, and as regards the American markets we think prices would have given way some, if it had not been for the new crop scare in the winter wheat, which has developed in Kansas and Nebraska owing to lack of rain. The weather in the winter wheat belt of the United States is certainly being characterized by extremes. In Illinois and Missouri, and the country surrounding these states, the complaint after the winter killing damage has been excessive rains and cold weather, preventing work on the land and the planting of corn, but over a large part of western and northwestern Kansas and southern Nebraska, there has been no rain for some time, and in the last ten days there has been excessive heat, with hot winds and dust storms. The well-known crop experts, Messrs. Snow, Ingalls and Lecount have been travelling by motor cars through the above country during the past week, and their reports all agree as to serious damage to the wheat crop by this unfavorable weather. At same time if good rains cover the district within a few days time, considerable improvement would follow. It seems evident however, that a certain amount of impairment from previous very favorable prospects must have been made, and the full prospect cannot be regained, and should a favorable turn of weather not come quickly a very serious shortage will be caused over an area containing probably 3,000,000 acres of winter wheat. This, added to the big shortage which has already been created in the soft winter wheat country, will be a matter of importance to the after harvest time, as then the reduction in yield will show in the lessened supply to the markets. In the meantime, traders in the wheat markets and especially the outside speculators, have become a little tired of the reiterated crop scares, and the markets are mostly dull, although at times the trading springs into nervous activity, making now a sharp decline in prices and again a sharp advance. On the week it is found that for the most part cash wheat and the May delivery in the United States markets show declines of 10 to 20, while the distant futures show advances of 4 to 10. In our Winnipeg market cash wheat is

1/4 to 1/2 lower, July is 1/4 lower and October is 1/4 lower. While the sea generally over America is late its advance is belated by the reports of wheat cutting having begun in Texas, but does not mean that harvest is general. Harvesting will not likely be general in Texas before the middle of June; some districts are reported to have good crops and others very poor, but as Texas has only 700,000 acres under wheat, and the indicated yield by the United States Government May Report is under 10,000,000 bushels, and the population of Texas is over 4,000,000 people, that state has no wheat for shipment to outside points. It does not raise enough for bread and seed, and gets the bulk of its breadstuffs and mill products from Kansas City and St. Louis.

The international movement of wheat has been greatly increased by the shipment of Canadian wheat from the Atlantic seaboard to Europe, following the opening of navigation of the Canadian Lakes. Last week the world's shipments were 13,536,000 bushels, compared with 13,440,000 bushels for same week last year. As showing the great change in the relative shipments of different countries, when compared with last year, we find that last week the exports from Russia were only 72,000 bushels against 5,440,000 bushels last year, and from America, including Canada, there were this year 7,184,000 bushels, against 2,968,000 bushels a year ago. Of course the bulk of this is Canadian wheat, and it is a matter of regret that a great deal of it is very low grade stuff. We sometimes wonder what our European friends are going to do with so much of this No. 5 and No. 6 wheat, not to mention the feed grade, and we fear many of them will have trouble over it, as a lot of it is liable to become ill-conditioned when it meets the warm summer atmosphere. At the same time it has been a great boon to the western farmer that so much of it has found a market at fair prices. The Argentine also is now shipping heavily, and a good deal of her wheat is of poor quality, owing to rain and rust damage. Europe probably never had so large a percentage of low grade wheat to her as she has at the present time, and it should have the effect of keeping up the price on high grade wheat. Last week there was a slight increase on the quantity on passage, and the aggregate is now 60,080,000 bushels, the largest quantity recorded for many years. The movement of wheat in the United States is now considerably

smaller than it was a year ago, and while flour trade is still called dull and slow, the United States visible supply decreased last week 2,343,000 bushels, against an increase of 1,013,000 bushels a year ago. The spring wheat crop in the United States and western Canada has had a mixed kind of start, owing to repeated rains and cold weather protracting seed. Early fields look well, and this last week there have been many thunder showers and higher temperature, good growing weather, only the rainfall seems superabundant. In the three leading spring wheat states of the United States there is believed to be a decrease of around ten per cent in the acreage compared with last year, but there will be no official figures to go by until the 10th June, when the U.S. Gov. June report comes out. In the Canadian west guesses at the acreage are being reduced, and probably five per cent increase over last year's acreage may turn out about right, because the shortage in plowing last fall and the last time and delay by excessive wet weather this spring, has prevented a good deal of land being put under wheat that would have been otherwise. A great deal of what is sown has been very poorly put in being disked in on stubble fields, and a great deal of poor seed has been used. The poor seed is already resulting in some fields having to be re-sown, the seed being rotted by the wet and cold, other fields show a very thin stand from the same cause. Nevertheless it is a wonderful country, and under favorable weather a good yield of wheat might result even from a poor beginning.

Our Winnipeg market has been steady, with a fair demand for all grades of wheat, prices at end of week being somewhat lower than a week ago. There is nothing in the local situation calling for special remarks. Today's cash prices are: 1 Nor., 103 1/2c; 2 Nor., 101c; 3 Nor., 96 1/2c; No. 4, 84c; No. 5, 74c; No. 6, 68c; Feed wheat, 55c; No. 2 Alberta Red Winter, 96 1/2c; No. 3 A.R. 94 1/2c; No. 4 A.R. 87 1/2c. Futures closed May 104c; July 103 1/2c, October 98c.

Oats.—There is very little change in oats, except that the contract grade is a shade easier, and the feed grades are a shade stronger; with keen demand for them. Today's cash prices are 2 Canadian Western 44 1/2c; 3 C.W. 42c; Red 1 Feed, 44c; 2 Feed, 43c; 2 Feed, 41 1/2c. Futures closed May 44 1/2c; July 46c.

All prices quoted above are based on delivery in store Fort William and Port Arthur.

TO ESTABLISH SAMPLE MARKETS

September of Next Year the Opening—Expert Buyers, Capital and Organization Necessary

Ottawa.—Hon. G. E. Foster, minister of trade and commerce, in a statement given to the public says:

Since the agitation for government elevators, private capital has kept largely out of the business of providing terminal storage. The uncertainty prevented decisive action. No one cared to go ahead, until the business was on a permanent basis. With the notices given, the individuals and companies will now know the policy to be pursued and can make arrangements accordingly.

The main portion of the statement given is to the effect that sample markets will be established by order-in-council in September, 1913.

Notice is necessary, says Mr. Foster, in order that the desired competition is as essential for a sample market may be had. Expert buyers will have to be on hand, possibly more capital and organization must be put into the buying process and terminal facilities be provided for storage and blending.

Cubans to Arm With Krag-Jorgensen Rifles

Washington.—The state department authorized the war department to honor the application of the Cuban government for 5,000 rifles and one million rounds of ammunition, which are to be used to arm the volunteers and the guards organized by the Cuban government to protect their property against the insurgents.

President Gomez wanted the latest type of Springfield rifle similar to the 10,000 already supplied to the Cuban army. When it was found that such arms could not be sold without express authority from Congress, and as it would take some time to secure the necessary legislation, the Cuban government decided to accept Krag-Jorgensen rifles instead.

These are practically new weapons, and put in thorough order when having been supplied with new barrels they were withdrawn from the regular army and set apart to form a reserve supply of about 100,000 stand to be used by a volunteer army in case of need.

The weapons will be sold to the Cuban government at about \$5 each, plus express charges.

Will Suffer Again This Year

Ottawa.—Owing to the large amount of work still to be done by the contractors on the National Transcontinental line between Superior Junction and Cochrane and the necessarily slow process of construction, it is now doubtful if this section of the line, giving the Grand Trunk through connection with western Canada, will be completed in time to help in relieving the certain congestion of western export wheat next fall. President Chamberlain and Vice-President Wainwright, of the Grand Trunk system, were in Ottawa conferring with the minister of railways and Chairman Leonard, of the National Transcontinental, relative to the possibility of having this vital link in the new line ready for operation when the grain begins to move. It were in readiness, the Grand Trunk Pacific could handle millions of bushels more of western wheat next autumn by bringing its cars through from Winnipeg to its own Georgian Bay and lake ports. At present, although all possible speed will be made with construction, it looks as though the road will not be in shape to handle the traffic offering, and the company will have to rely largely on using the line from Superior Junction to Port Arthur. The storage capacity at Port Arthur and Fort William will not be anything like large enough to avoid an early congestion if present western crop prospects are realized. Railway officials declare that despite everything they can do there is bound to be a bad wheat blockade in the west this year.

Canada's Exhibit at Milwaukee

Milwaukee, Wis.—The controversy between the land department of the Canadian government and the Wisconsin State Fair Board took on a more serious aspect on Monday, when an official order was received from the government at Ottawa by the representative of the land department in Milwaukee that money in any amount must not be spared to make the Canadian exposition here at the time of the state fair the greatest Canadian exposition ever held in the United States. The order further stated that the 7th Cameron Highlanders band of Winnipeg, will be ordered to Milwaukee for fair week and that a parade over two miles in length of Canadian grown products of the soil will be organized. Several hundred Canadian horses from the Northwest will be sent to draw the monster floats.

Lord Strathcona is Granted Medal

London.—The Albert medal of the Royal Society of Arts for the current year has been awarded by the council with the approval of the president of the society, H. R. H. the Duke of Connaught, to Lord Strathcona for his services in improving rail communications, developing the resources and promoting the commerce and industry of Canada and other parts of the British Empire.

Western Farmers Blamed for High Price of Gasoline

Toronto.—E. West, manager of a big oil company, is here and attributes the present high price of gasoline to the enormous demands for that article from the western farmers. One agriculturist working a huge area of wheat land in Saskatchewan, recently laid in a stock of 12,000 barrels to feed his motor plows.

Sir Charles Tupper in Vancouver

Vancouver, B.C.—I am feeling stronger than when I left England, and hope soon to be myself again, said Sir Charles Tupper, on arrival here. We had good weather on the ocean trip, and I withstood the railway journey exceedingly well.

THE SUNDAY SCHOOL

LESSON XI.—SECOND QUARTER, FOR JUNE 16, 1912

Text of the Lesson, Matt. xi., 2-19. Memory Verses, 5-8—Golden Text, Luke vii., 28, H.V.—Commentary Prepared by Rev. D. M. Stearns.

According to the harmony of the gospels, the sermon on the Mount was followed by His using Simon Peter's boat as a pulpit and then filling their net with fishes after a night of fruitless toil. After that came the healing of the leper and the palsied man, the call of Matthew and the feast he prepared in his own house, the healing of the impotent man at Bethesda, the man in the synagogue with the withered hand, the night of prayer, the choosing of the twelve, the sermon on the plain, the healing of the centurion's servant, the raising to life of the widow's son and much preaching day by day. Whether this is quite correct as to the order of events or not is not so important if we can by faith see ourselves day by day with Him who, being anointed with the Holy Ghost and with power, went about doing good and healing all that were oppressed of the devil, (Luke ix. 1-10). Him, and doing through Him the miracles and signs and wonders (Acts x. 38, H. 22).

There was one great and good man who did not see these wonders of His power from day to day, for he was shut up in a prison for the truth's sake, but he heard of them and evidently wondered why the owners to whom he had seen the Spirit descend like a dove and remain upon Him, he had been told by God, was the Messiah and whom he had pointed out as the Lamb of God (John i. 31-35). He did not deliver him from prison, for it had been predicted concerning Him that He would proclaim liberty to the captives and the opening of the prison to them that are bound (Isa. lxi. 1). As far as we know Jesus never visited John in prison nor sent him any message up to the time, and the father of lies was no doubt very busy with John questioning the way of God and the love of God and insinuating that, after all, John must have been mistaken in pointing out Jesus as the Messiah. If John had not been in some way and in some measure offended with Jesus would He have sent him the message He did. "Blessed is he who ever shall not be offended in Me" (Verse 6). To the question of John through the two disciples whom he sent, "Art thou he that should or do we look for another?" (verse 3), Jesus in that sanhedrin wrought many miracles and said, "Go your way and tell John what things ye have seen and heard," and then He added the word about not being offended (Luke vii. 20-23). At one time Jesus said to the Jews, "If I do not the works of my Father believe Me not, but if I do, though ye believe not Me, believe the works that ye may know and believe that the Father is in Me and I am Him" (John x. 37, 38). All this is in accord with last week's lesson on the necessity of works as an evidence, and doing always precedes teaching (Matt. v. 19; Mark vi. 30; Acts i. 1, 2; Luke xiv. 19). Notwithstanding all His mighty works on behalf of Israel when and after He had brought them out of Egypt, they were constantly being offended with Him and murmuring against Him. They spoke against Him, they believed not in Him, they provoked Him, they forgot Him, and many a time He, being full of compassion, turned His anger away from them, for He remembered that they were his flesh (Is. lxviii). What a picture of ourselves we can make of the Jews, who were constantly being offended with Him and murmuring against Him. They spoke against Him, they believed not in Him, they provoked Him, they forgot Him, and many a time He, being full of compassion, turned His anger away from them, for He remembered that they were his flesh (Is. lxviii). What a picture of ourselves we can make of the Jews, who were constantly being offended with Him and murmuring against Him. They spoke against Him, they believed not in Him, they provoked Him, they forgot Him, and many a time He, being full of compassion, turned His anger away from them, for He remembered that they were his flesh (Is. lxviii). What a picture of ourselves we can make of the Jews, who were constantly being offended with Him and murmuring against Him. They spoke against Him, they believed not in Him, they provoked Him, they forgot Him, and many a time He, being full of compassion, turned His anger away from them, for He remembered that they were his flesh (Is. lxviii). What a picture of ourselves we can make of the Jews, who were constantly being offended with Him and murmuring against Him. They spoke against Him, they believed not in Him, they provoked Him, they forgot Him, and many a time He, being full of compassion, turned His anger away from them, for He remembered that they were his flesh (Is. lxviii). A. F. LARKIN
 Telford Building, - Gleichen

TOWN AND DISTRICT

Baseball tonight with Bassano. Does it pay to risk losing all your crops through hail, when you can secure protection cheap? Talk with W. H. McKie.

The editor of country papers should rise to the occasion and throw all proposals from advertising agencies into the waste basket.

The Alberta Government Telephone exchange has been changed this week from F. H. Blackburn's store to T. H. Beach's new block.

Next Wednesday evening, June 19th, a dance is to be given in Cluny, at which a chicken supper will be served. All are cordially invited to attend, and it is expected quite a number will be present from Gleichen.

It is now stated that the C. P. R. has decided to locate one of its experimental farms at Gleichen, and one of their engineers was here Saturday afternoon and made an examination of the quarter section immediately adjoining the town north and west.

We will take your note due November 1st, and insure your crops against hail. Call and see W. H. McKie.

Tuesday evening a young fellow with an overdose of booze got quarrelsome and finally pulled a revolver in the Palace wet grocery department, when there was a hurried scattering of patrons. The police, however, quickly locked up the wild man, and yesterday F. C. Vigar gave him employment for thirty days in the Calgary jail.

A. S. Spradbury arrived Saturday from Whitehorse, Yukon, and spent a few days with his former Gleichen friends. It is now more than twenty years since he first came to Gleichen as a member of the N.W.M.P. and he still has interests here, owning several valuable town lots and a farm north of town. When he clears up his interests in the Yukon he hopes to return here to reside.

A very pretty wedding was solemnized in Gleichen Wednesday afternoon, June 5th, at the home of Mr. and Mrs. F. C. Vigar, the bride being Miss Elsie Vigar, and the groom Mr. Daniel Martin, both of Reservoir Creek. The wedding service was conducted by the Rev. Mr. Mitten, and witnessed by about twenty-five guests, after which all enjoyed themselves at a sumptuous repast. The bride received a large number of useful and handsome presents. The happy couple took the afternoon train en route to Calgary, Banff, and other western points. The many friends join in wishing them a long, happy and useful life—Communicated.

The Maple in Canada Exhibition train arrived in Gleichen ahead of time and Manager Sealey states before its departure that he was quite sure more than 1000 Gleichenites had passed through the train. Mayor Bray and Aldermen Jones met the train at Calgary and came down on it and were right on hand to assist in giving information. There were many fine exhibits and all were tastefully arranged. Although there were ten cars of exhibits there might have been ten times that number were all the articles made in Canada included, and as this may become an annual exhibition the manager stated that undoubtedly next year the manufacturers would take a much more general interest for they already realized the good accomplished.

Geo. Black was in from the Hand Hills a few days this week visiting his numerous friends after an absence from Gleichen of eighteen months. He states the crops there are looking fine and give promise of splendid results. Speaking of his own farm he said that 20 acres of "Little Club" wheat he sowed on April 14th is already heading and he expects it will be in full head by June 24th, and has promised to send in a specimen of the wheat then for exhibition at this office. Mr. Black will later give the Call a full description of how he has prepared his land and the success he has with this early wheat. He does not think his own farm the best in that locality, and mentioned that he thought "Scotty" Clark has wheat even further advanced than his.

Cluny, June 5th, 1912

Dear Editor:

Kindly allow me the use of your paper to thank all those who sympathized with me in the great loss that befell me last Friday May 31st, when my dear wife died at the St. Joseph school, south of Cluny. Let me say that I will never forget all the Sisters done for my wife, and the many kindnesses they bestowed upon me in their efforts to comfort me in this great affliction. Another I shall ever remember is Rev. Father Levern, who went to endless trouble for my sake and helped me in those sad days.

J. A. Maynard.

F. C. Vigar has started the erection of his building for an electric light plant.

The many friends of S. M. Dickinson will be pleased to learn that the proposal to remove him from the Blackfoot Indian Agency has been indefinitely postponed. Mr. Dickinson has been clerk and assistant agent for more than five years here, and, regardless of politics, his friends hope that he will long remain in Gleichen. Mr. Dickinson was appointed an official under the Conservative party, held his position during all the time the Liberals were in power, but since the last change in Government it has been proposed to move him from here without promotion and his friends now object, and, seemingly with success. If it is for political reasons or favoritism that Mr. Dickinson is to be removed it is evident that the powers that be have more than a little trouble to contend with.

BY-LAW NO. 35

A BY-LAW OF THE TOWN OF GLEICHEN to raise the sum of Five Thousand Dollars:

WHEREAS IT IS DEEMED EXPEDIENT BY THE COUNCIL OF THE Town of Gleichen to raise by way of loan, on the credit of the Municipality the sum of Five Thousand Dollars to be used in the completion and extension of the Water and Sewer Works in the said town of Gleichen;

AND, WHEREAS, it is deemed advisable that the indebtedness thus created should be spread over a period of twenty years and that the debentures issued hereunder bear interest at the rate of six per centum per annum;

AND, WHEREAS, the whole rateable property of the Town of Gleichen according to the latest revised Assessment Roll is \$502,340.00

AND, WHEREAS, the Town of Gleichen has no existing debt outside of a bonded debt of \$39,000.00 and the current debt of the year;

AND, WHEREAS, it is deemed expedient that the by-law take effect on the 6th day of July, A. D. 1912;

AND, WHEREAS, the Certificate of Health, pursuant to the provisions of sections 11 and 12 of the Public Health Act to complete and extend the said Waterworks and Sewerage System in the Town of Gleichen according to the plans and specifications now on file in the office of the Chairman of the Provincial Board of Health;

THEREFORE, the Council of the Town of Gleichen enacts as follows:

1.—That the sum of Five Thousand Dollars be raised to be used in the completion and extension of the Water and Sewerage Works in the said town of Gleichen and for the purpose of raising the said sum one or more debentures of not less than \$100.00 each (the said sum of Five Thousand Dollars, aforesaid, shall be raised, each of which debentures shall be dated of the day in which this by-law takes effect and shall be payable in twenty equal consecutive annual installments of principal and interest at the rate of six per centum per annum in the Town of Gleichen, Alberta.

2.—Each of the said debentures shall be signed by the Mayor and Secretary Treasurer of the Town of Gleichen and shall be sealed with the seal of the Corporation of the Town of Gleichen.

3.—The said debentures shall bear interest at the rate of six per centum per annum, payable annually and shall have attached to them coupons for the payment of the annual installment of principal and interest, which coupons shall be signed by the Mayor and Secretary Treasurer of the Town of Gleichen.

4.—The said money shall be expended in the completion and extension of the Water and Sewerage Works of the said Town of Gleichen.

5.—During the currency of the said debentures there shall be raised annually by special rate on all the rateable property of the Town of Gleichen the sum of \$45.92 for the purpose of paying the amount of the annual installments of principal and interest in each of the said years in respect of the said debt.

6.—This by-law shall take effect and come into force on the 6th day of July, A. D. 1912.

7.—That the votes of the duly qualified electors of the Town of Gleichen shall be taken on the 5th day of July, A. D. 1912, in the office of the Secretary-Treasurer, on Fifth Avenue in the Town of Gleichen commencing at the hour of 10 o'clock in the forenoon and continuing to the hour of 7 o'clock in the afternoon of the same day and the Returning Officer for taking the said votes shall be William J. Burr.

8.—The said Returning Officer shall sum up the number of votes for and against this by-law on the 5th day of July, A. D. 1912, at the hour of 7 o'clock in the afternoon, in the office of the Secretary-Treasurer, on Fifth Avenue, in the Town of Gleichen aforesaid.

9.—This by-law shall be finally considered by the Council of the Town of Gleichen, and if same shall have been assented to by the electors, shall then be passed on the 5th day of July, A. D. 1912, in the office of the Secretary-Treasurer of the Town of Gleichen, aforesaid, at the hour of eight o'clock in the evening.

READ A FIRST AND SECOND TIME in open Council, this 7th day of JUNE, A. D. 1912.

(Signed)
 Charles J. Bray, Mayor.
 W. J. Burr, Secretary-Treasurer.

NOTICE

The above is a true copy of a proposed by-law which will be taken into consideration by the Council of the Town of Gleichen after being voted on by the electors, and is first published this 13th day of June, A. D. 1912.

The votes of the electors will be taken on the 5th day of July, 1912, between the hours of ten o'clock in the forenoon and seven o'clock in the afternoon of the same day, at the office of the Secretary-Treasurer, in the Town Hall, Fifth Avenue, in the said Town of Gleichen.

W. J. BURR,
 Secretary-Treasurer,
 Town of Gleichen.

GLEICHEN TRAIN ARRIVALS

According to the new C. P. R. Time Table the passenger trains arrive in Gleichen as follows:

West bound—No. 61 at 1:45; No. 13 at 2:05; No. 515 at 10:40; No. 3 at 11:40; No. 1 at 12:38.

East bound—No. 62 at 1:45; No. 2 at 2:28; No. 4 at 11:10; No. 515 at 11:11; No. 14 at 12:08.

The letter "a" before each time indicates the passengers that stop at Gleichen regularly.

MISCELLANEOUS

Small Ads under this heading cost 50 cents for first insertion and 10 per cent when more than one item is included an additional charge is made. Unless the number of issues are given with each order ads are left in until ordered out and charged for in full.
